Four Corners Activity: Reading Graphs

Objective What are we learning about?

Students will practise reading and interpreting concrete graphs by participating in a Four Co rs activity.

Materi ill you need for the activity?

- A list of q
- Large concrete
- Labels for each corne oom D)

Instructions How will you comp he acti

1. Display the concrete graph prominently in l students can see it.
2. Prepare the classroom by labelling each corner with letter
3. Explain to the students that you will be asking them questions a the information shown in the graph.
4. When you read a question, students will move to the corner that corresponds to the answer they think is correct. Some of these will be opinion questions. For these questions, have students discuss their opinions in that corner with others who also chose that option. Then discuss as a class.
5. Once all students have chosen their corners, reveal the correct answer and discuss why it is correct.
6. Repeat with different questions to reinforce their understanding of concepts.

Activity Title: Flip the Data

Objective

What are we learning about?

Students will engage in a fun and active game where they read data from a pictograph and answer questions to earn the opportunity to flip a bottle or cup.

Materials

What will you need for the activity?

- B[illegible]ps [illegible]ing
- A s[illegible]board [illegible]r to display bar graphs
- Timer (sto[illegible]rtp[illegible]app)
- Question ca[illegible]on th[illegible]h data
- Scoreboard to [illegible]rack [illegible]

Instructions

How will yo[illegible]mple[illegible]ity?

1. Divide the class into small teams, ideally of 5 [illegible]tude[illegible]ch.
2. Prepare a series of pictographs to display [illegible]smar[illegible]n with corresponding question cards that ask about t[illegible]dat[illegible]gr[illegible]
3. One team at a time comes to the front where the gr[illegible]play
4. Display the first pictograph on the smartboard.
5. The first student from the active team reads the graph and sel[illegible]card. Start the timer when the question is first shown.
6. The student answers the question based on the data presented in the graph. The teacher checks the answer.
7. If the student answers correctly, they have 5 tries to flip their bottle or cup until they land it upright. When they do, the next teammate can take their turn.
8. If the student's answer is incorrect, they must try another question card before they can attempt to flip.
9. The team's turn ends either when all members have successfully flipped their bottle/cup or when the timer reaches a set limit (e.g., 3 minutes).
10. Record the team's time or number of successful flips on the scoreboard.
11. Repeat steps 4-10 for each team. The team with the fastest time/most flips wins.

Likelihood of Events – Rolling a Dice

Rolling a Dice

A dice has 6 sides. Each side has a number of dots between 1 and 6. When you roll a dice, it is possible you could get any of the numbers from 1-6.

PREVIEW

Questions	Use these terms to describe the likelihood: Certain, Possible, Impossible.

1) What is the likelihood of you rolling a 1?	
2) What is the likelihood of you rolling a 5?	
3) What is the likelihood of you rolling a 1, 2, 3, 4, 5, or 6?	
4) What is the likelihood of you rolling a 7?	
5) What is the likelihood of you rolling an odd number?	
6) What is the likelihood of you rolling a 0?

Predicting Survey Results – Food - Class

When we do a survey, we can predict what the results will be based on who we ask. The people we survey are called the population. If you ask adults the same question that you ask kids, you will probably be able to predict different survey results. Try it below!

Predict What do you predict will be the results of the survey.

1) Write down what you think the results will be if you asked 10 students in your class the question: "What is your favourite food?"

Survey Question : What is your favourite food?

Categories			Steak	Fish	Sandwiches
Frequency					

2) Complete the survey by asking your classmates.

Survey Question : What is your favourite food?

Categories	Pizza	Hot Dog	Steak	Fish	Sandwiches
Tally					
Frequency					

Results How were your predictions?

Were your predictions accurate or not? What surprised you?
