Activity Title: Sound Clap Patterns

Objective What are we learning about?

Students will create and recognize patterns using clapping and other sounds. This activity helps students understand and identify patterns through a fun and interactive method.

Materials What you will need for the activity.

- None

Instructions How you will complete the activity.

1. Begin by explaining to the students that they will create patterns using clapping and other sounds, like snapping or stomping.
2. Demonstrate a simple pattern, such as "clap, clap, snap, clap," and have the students repeat it.
3. Divide the students into small groups and ask each group to come up with their own unique sound pattern.
4. Allow each group to perform their pattern in front of the class.
5. After each performance, ask the rest of the class to identify and extend the pattern. For example, if the pattern is "clap, clap, snap, clap," the next part could be "clap, clap, snap, clap, clap, clap, snap, clap."
6. Repeat the process with each group, encouraging creativity and variation in the patterns they create.

C1.1, C1.2

Reflection | Answer the questions below.

1) Describe your pattern below.

2) Describe the pattern of another group.

3) Translate the pattern you made into shapes. For example, if the pattern was clap, clap, snap, clap, clap, snap, then you would do square, square, circle, square, square, circle.

4) Translate the pattern another group made.

Activity Title: Pattern Treasure Hunt

Objective

What are we learning about?

To reinforce students' understanding of growing addition and shrinking subtraction patterns through a dynamic and engaging treasure hunt game. This activity aims to improve problem-solving speed and accuracy while promoting teamwork and active learning.

Materials

What you will need for the activity.

- Stop[w]atch or [yo]u use a smartphone)
- Index card[s]
- Markers
- Small prizes or [t]reats (fo[r]
- Tape

Instructions

How you will comp[lete] the acti[vity]

1) Cut out the index cards provided. These wil[l] be trea[sure] challenge questions.
2) Hide these cards around the classroom or in a des[ig]nated safe ou[t]door area, taping them under chairs, desks, or tucked into non-obvio[us] spots.
3) Divide the class into small teams and give each team a stopwat[ch].
4) Explain the game: each team will hunt for a card, solve the problem on it as quickly as they can, and return to you for verification.
5) Start the timer when you say "Go!" Each team rushes to find their first card.
6) When a team thinks they have the correct answer, they come back to you for verification. If they get it right, the teacher keeps the card. If the answer is wrong, they can try again or hide the card back in its original spot and find a new card.
7) The game continues until all cards are found or you call time. The team with the most correct answers wins.
8) Discuss the game, focusing on the concepts taught on the cards.

Activity: Dance Party Code

Objective — What are we learning about?

Students will write a sequence of dance moves to create a short dance routine, practicing sequential events, and then alter the sequence to observe how changes affect the performan

Mate — u will need for the activity.

- Worksheet dance (one per student)
- Pencil or crayon
- Open space in the classro dan
- Optional: Music for a fun atmosphe

Instructions — How you will complete the ac y

1. Tell students they'll be "coders" creating a dance routine by wri moves.
2. Show them a few simple dance moves (e.g., jump, clap, twirl, stomp) y can use.
3. Give each student a worksheet (or put them in pairs/small groups) to write a short sequence of 3 or 4 dance moves (e.g., "jump, clap, twirl").
4. Have one student/pair/group read their sequence aloud and perform their dance for the class.
5. Repeat with 1-2 more students/groups, having them share and perform.
6. Wrap up by explaining how the order of moves affect the dance, connecting it to coding sequences.

Example Moves Choose from the example moves below or make up your own.

Dance Move	Description
Jump	Hop off the ground with both feet.
Clap	Clap hands together once or twice.
Twirl	Spin around in a circle on the spot.
[illegible]	Stamp one foot on the ground.
[illegible]	Jump on one foot.
Wiggle	Shake your whole body side to side.
Wave	Wave your hand in the air.
Step Forward	Take one big step forward.
Step Backward	Take one big step backward.
Spin	Turn around quickly in a circle.
Sway	Rock side to side gently.
Tap	Tap one foot lightly on the ground.
Bounce	Bend knees and bounce up and down.
March	Lift knees high and march in place.
Shake	Shake arms or hips side to side.
Point	Point one finger up or to the side.
Kick	Kick one leg forward gently.
Nod	Nod your head up and down.
Twist	Twist your hips side to side.
Reach	Stretch both arms up high.

Activity: Draw a Picture Sequence

Objective

What are we learning about?

Students will write a sequence of steps to draw a simple picture and identify and fix an error in a given sequence, practicing how to create, follow, and debug sequential events.

Materials

What you will need for the activity.

- W… written sequence of drawing s… containi… r), space to write a corrected sequ… ce, an… ea t… draw (one per student)

Instructions

H… ou w… n… the activity

1. Tell students they'll be "c… cre… e by writing a sequence of drawing steps, and they'll also fix mistakes … nce.
2. Show them a correct smiley face o… e board … expl… e steps (e.g., "draw a circle, add two eyes, draw a smile").
3. Give each student the worksheet with a pre-w… e… ce … errors (e.g., "draw a square, add two eyes, draw a smile"—the … draw a … e" instead of "draw a circle").
4. Ask students to follow the given sequence and draw the pictur… a of their worksheet.
5. Discuss as a class why the drawing doesn't look like it should (e.g., it has a square head instead of a round one).
6. Have students identify the errors and write a corrected sequence on their worksheet (e.g., "draw a circle, add two eyes, draw a smile").
7. Ask them to draw the picture again using their corrected sequence.
8. Have a few students share their corrected sequence and new drawing, discussing how fixing the errors made the picture correct.
9. Wrap up by explaining how finding and fixing mistakes is part of coding, just like they debugged their drawing sequence.

Instructions **First Drawing – With Errors**: Follow the code and draw the picture below.

Step	Instruction
1	print: draw a large triangle on the bottom of the page for the mountain
2	print: draw a small square above the mountain for the cloud
3	print: draw a small circle on the bottom left of the mountain for the sun
4	print: draw a tall rectangle on the right of the mountain for the tree trunk
5	print: draw a small triangle on top of the tree trunk for the tree leaves
6	print: draw a small semi-circle above the tree for the bird
7	print: draw another small semi-circle connected to the other one for the bird
8	print: draw a small circle on the mountain for a path
