

Preview – Information

Thank you for your interest in this Mega Bundle. This product contains multiple Workbooks and Google Lesson Slides. Within this preview, you will see:

- ✓ A selection of Ready-To-Use Google Lesson Slides for each unit.
- ✓ A selection of worksheets included in each workbook.

When you make a purchase, you will receive a folder that contains each of the .pdf workbook files and links to where you can make copies of the Google Lessons units to your Google Drive.

Thank you for shopping with us. Please let us know if you have any questions at:

rob@supersimplesheets.com

Saskatchewan Math Curriculum Shape & Space – Grade 1

3-Part Lesson Format

Part 1 – Minds On!

- Learning Goals
- Discussion Questions
- Quotes
- And More!

Learning Goal

We are learning to find how long shapes and objects are so we can tell how they are the same or different.

Comparative Language

Circle the relationship between column 1 and column 2.

Column 1	Column 1 is _____ than Column 2	Column 2	Column 1	Column 1 is _____ than Column 2	Column 2
	the same length as a different length than			the same length as a different length than	
	the same length as a different length than			the same length as a different length than	
	the same length as a different length than			the same length as a different length than	
	the same length as a different length than			the same length as a different length than	

Part 2 – Action!

- Writing
- Matching
- Drag and Drop
- Drawing
- And More!

Part 3 – Consolidation!

- Exit Cards
- Quizzes
- Reflection
- And More!

Exit Card – I Wonder Statements

Think about what you learned today about measuring and comparing the length of shapes and objects.

Write two "I wonder..." statements to show your thinking.

Examples:

- I wonder why some objects are easier to measure than others.
- I wonder if I can measure the playground equipment the same way I did in class.

Saskatchewan Math Curriculum

Shape & Space – Grade 1

Capacity

Which container has more capacity? Drag the checkmark to your answer.

 ☐	 ☐	 ☐	 ☐	 ☐	 ☐
 ☐	 ☐	 ☐	 ☐	 ☐	 ☐

 Heaviest	 Lightest	 Heaviest	 Lightest
3) The desk is the _____		2) The kite is the _____	
 Heaviest	 Lightest	 Heaviest	 Lightest
4) The bed set is the _____		5) The fridge is the _____	
 Heaviest	 Lightest	 Heaviest	 Lightest
6) The air conditioner is the _____		7) The backpack is the _____	
 Heaviest	 Lightest	 Heaviest	 Lightest

	The apple weighs _____ ●		The gift box weighs _____ ●
	The vase weighs _____ ●		The blender weighs _____ ●
	The television weighs _____ ●		The backpack weighs _____ ●

Workbook Preview

Grade 1

Shape and Space

	Curriculum Expectations	Pages
SS1.1	Demonstrate an understanding of measurement as a process of comparing by: • identifying attributes that can be compared • ordering objects • making statements of comparison • filling, covering, or matching	5 – 72
Preview of 100 pages from this product that contains 237 pages total.		
SS1.3	Replicate composite 2-D shapes and 3-D objects.	124 – 132
SS1.4	Compare 2-D shapes to parts of 3-D objects in the environment.	133 – 140

Length of Objects – Height, Width, Depth

Length is the distance between two points. Objects have three different lengths:

Height – how tall something is

Width – how wide something is

Depth – how deep something is

Quest: Label the height, width and depth of the objects

Name: _____

6

Curriculum Connection
SS1.1

Length of Objects - Taller

Part 1

Which object is taller?

1)

2)

3)

4)

Part 2

Draw 3 tall objects you have seen in _____

--	--	--

Length of Objects - Wider

Part 1

Which object is wider?

1)

2)

3)

4)

Part 2

Draw 3 wide objects you have seen in your life

--	--	--

Exit Cards

Cut Out

Cut out the exit cards below and have students complete them at the end of class

Name: _____

Colour the widest rectangle.

Five horizontal rectangles of varying widths and heights, arranged vertically. The top rectangle is the widest, and the bottom one is the narrowest. Each rectangle is intended to be colored by the student.

Name: _____

Colour the widest rectangle.

Five horizontal rectangles of varying widths and heights, arranged vertically. The top rectangle is the widest, and the bottom one is the narrowest. Each rectangle is intended to be colored by the student.

Name: _____

Colour the widest rectangle.

Five horizontal rectangles of varying widths and heights, arranged vertically. The top rectangle is the widest, and the bottom one is the narrowest. Each rectangle is intended to be colored by the student.

Name: _____

Colour the widest rectangle.

Five horizontal rectangles of varying widths and heights, arranged vertically. The top rectangle is the widest, and the bottom one is the narrowest. Each rectangle is intended to be colored by the student.

Comparing Length – Shortest or Longest

Questions

Follow the instructions below. Use small blocks to help you compare

1) Colour the longest rectangle.

--	--	--

2) Colour the shortest rectangle.

--	--	--

3) Colour the longest rectangle.

--	--	--

4) Colour the shortest rectangle.

--	--	--

5) Colour the longest rectangle.

--	--	--

6) Colour the rectangle that is **not** the longest or the shortest.

--	--	--

7) Colour the longest rectangle.

--	--	--

8) Colour the rectangle that is **not** the longest or the shortest.

--	--	--

Exit Cards

Cut Out

Cut out the exit cards below and have students complete them at the end of class

Name: _____

Colour in the shortest shape. Put a circle around the tallest shape. Put a rectangle around the widest shape.

Name: _____

Colour in the shortest shape. Put a circle around the tallest shape. Put a rectangle around the widest shape.

Name: _____

Colour in the shortest shape. Put a circle around the tallest shape. Put a rectangle around the widest shape.

Name: _____

Colour in the shortest shape. Put a circle around the tallest shape. Put a rectangle around the widest shape.

Comparing Length – Shortest to Longest

Questions

Order the shapes from shortest (1) to longest (3)

1)

2)

Comparative Language

Questions

Circle the relationship between column 1 and column 2

Column 1	Comparative Language Column 1 is ____ than Column 2	Column 2
	longer than as long as not as long as	
	longer than as long as not as long as	
	longer than as long as not as long as	
	longer than as long as not as long as	
	longer than as long as not as long as	
	longer than as long as not as long as	

Comparing Height – Tallest and Shortest

					
Elephant	Bear	Giraffe	Dog	Cat	Tiger

Question: _____ whether the object is shorter or taller

1) The elephant is _____ the giraffe.	shorter than taller than
2) The bear is _____ the giraffe.	shorter than taller than
3) The giraffe is _____ all the other animals.	shorter than taller than
4) The dog is _____ the tiger.	shorter than taller than
5) The cat is _____ all the other animals.	shorter than taller than
6) The tiger is _____ the bear.	shorter than taller than
7) The bear is _____ the elephant.	shorter than taller than
8) The elephant is _____ the giraffe.	shorter than taller than

Comparing Height – Tallest and Shortest

Part 1

Rank the animals from tallest (1) to shortest (6)

					
Elephant		Giraffe	Dog	Cat	Tiger

Part 2

Rank the buildings from tallest (1) to shortest (6)

Part 3

Rank the trees from tallest (1) to shortest (6)

Comparing Length – Curved String

Questions

Follow the instructions below

1) Circle the longest string2) Circle the shortest string3) Circle the longest string4) Circle the shortest string5) Circle the longest string6) Circle the shortest string

Activity: Yarn Length Challenge

Objective

What are we learning about?

Students will practice comparing lengths and learn about measurement through a fun and interactive activity.

Materials

What you will need for the activity.

- Yarn (enough for a pair of students to have three different lengths)
- Scissors
- Rulers or measuring tape
- Paper and pencils for recording

Instructions

How you will complete the activity.

- 1) Pair up the students and provide each student with a large piece of yarn.
- 2) Have one student in each pair cut their yarn into three different lengths.
- 3) The student who cut the yarn should then twist or curve the three pieces of yarn so that it is difficult to visually compare their lengths.
- 4) The partner will then try to determine which piece of yarn is the longest, which is the shortest, and which is in the middle in terms of length.
- 5) Once the partner has made their guesses, they will pull each piece of yarn straight and measure it using a ruler or measuring tape to verify their guesses.
- 6) Both students will then switch roles, repeating the process with new lengths of yarn.

Exit Cards

Cut Out

Cut out the exit cards below and have students complete them at the end of class

Name: _____

- 1) Circle the
- longest
- string.

- 2) Circle the
- shortest
- string.

- 3) Circle the
- longest
- string.

Name: _____

- 1) Circle the
- longest
- string.

- 2) Circle the
- shortest
- string.

- 3) Circle the
- longest
- string.

Name: _____

- 1) Circle the
- longest
- string.

- 2) Circle the
- shortest
- string.

- 3) Circle the
- longest
- string.

Name: _____

- 1) Circle the
- longest
- string.

- 2) Circle the
- shortest
- string.

- 3) Circle the
- longest
- string.

Comparing Length – Yes/No

Questions

Circle yes if the sentence is correct and no if it is wrong

1) My foot is longer than my pencil.	Yes	No
2) The door is taller than the whiteboard.	Yes	No
3) My finger is shorter than my arm.	Yes	No
4) A pencil is as long as a pencil crayon.	Yes	No
5) A crayon is the same length as a marker.	Yes	No
6) A water bottle is shorter than a paper clip.		No
7) I am the same height as my teacher.		No
8) My teacher is the tallest in the class.	Yes	No
9) I am the same height as my friend.	Yes	No
10) My foot is a different length than my friends.	Yes	No

Exit Cards

Cut Out

Cut out the exit cards below and have students complete them at the end of class

Name: _____

Circle yes if the sentence is correct and no if it is wrong.

If your pencil is taller than a crayon and shorter than your marker, can the crayon be taller than the marker?

Yes

No

Name: _____

Circle yes if the sentence is correct and no if it is wrong.

If your pencil is taller than a crayon and shorter than your marker, can the crayon be taller than the marker?

Yes

No

Name: _____

Circle yes if the sentence is correct and no if it is wrong.

If your pencil is taller than a crayon and shorter than your marker, can the crayon be taller than the marker?

Yes

No

Name: _____

Circle yes if the sentence is correct and no if it is wrong.

If your pencil is taller than a crayon and shorter than your marker, can the crayon be taller than the marker?

Yes

No

Which Container Holds More?

Comparing Capacity – Most or Least

QuestionsCircle whether the container holds the **most** or the **least**

1) The bucket holds the _____.

Most
Least

2) The bowl holds the _____.

Most
Least

3) The baby bottle holds the _____.

Most
Least

4) The cup holds the _____.

Most
Least

5) The gas can hold the _____.

Least

6) The wheelbarrow holds the _____.

Most
Least

7) The pool holds the _____.

Most
Least

Comparing Capacity – Least to Most

Questions

Order the capacity of the containers from least (1) to most (3)

1)

2)

3)

4)

5)

6)

7)

8)

9)

Comparing Capacity – More Than, Less Than

					
Bucket	Dog Bowl	Cup	Pool	Bottle	Spoon

Questions: Write whether the container holds more or less

1) The bucket holds _____ the pool.	more than less than
2) The cup holds _____ the spoon.	more than less than
3) The dog bowl holds _____ the cup.	more than less than
4) The pool holds _____ all the other containers.	more than less than
5) The bottle holds _____ the bucket.	more than less than
6) The spoon holds _____ all the other containers.	more than less than
7) The cup holds _____ the bottle.	more than less than
8) The bucket holds _____ the spoon.	more than less than

Exit Cards

Cut Out

Cut out the exit cards below and have students complete them at the end of class

Name: _____

Circle whether the container holds more or less.

The shoulder bag holds _____ the pencil case.	More than Less than
The backpack holds _____ the luggage.	More than Less than
The luggage holds _____ all the other bags.	More than Less than
The pencil case holds _____ all the other bags.	More than Less than

Name: _____

Circle whether the container holds more or less.

The shoulder bag holds _____ the pencil case.	More than Less than
The backpack holds _____ the luggage.	More than Less than
The luggage holds _____ all the other bags.	More than Less than
The pencil case holds _____ all the other bags.	More than Less than

Name: _____

Circle whether the container holds more or less.

The shoulder bag holds _____ the pencil case.	More than Less than
The backpack holds _____ the luggage.	More than Less than
The luggage holds _____ all the other bags.	More than Less than
The pencil case holds _____ all the other bags.	More than Less than

Name: _____

Circle whether the container holds more or less.

The shoulder bag holds _____ the pencil case.	More than Less than
The backpack holds _____ the luggage.	More than Less than
The luggage holds _____ all the other bags.	More than Less than
The pencil case holds _____ all the other bags.	More than Less than

Comparing Capacity – Most to Least

Part 1 Rank the capacity of the containers from most (1) to least (6)

Part 2 Rank the capacity of the containers from most (1) to least (6)

Part 3 Rank the capacity of the containers from most (1) to least (6)

Activity Title: 4-Corners Capacity Game

Objective What are we learning about?

Students will learn to compare and estimate the capacities of various containers through an interactive activity.

Materials What you will need for the activity.

- A list of comparison questions
- Labels for each corner (A, B, C, D)

Instructions How you will complete the activity.

1. Prepare the classroom by labelling each corner with A, B, C, and D.
2. Explain to the students that you will read out questions related to the capacity of different containers, and each question will have four options.
3. When you read a question, students will move to the corner that corresponds to the answer they think is correct.
4. Once all students have chosen their corners, reveal the correct answer and discuss why it is correct.
5. Repeat with different questions to reinforce their understanding of capacity.

Question	A	B	C	D
Which of these containers can hold the most?	Hot tub	Swimming pool	Lunch box	Pencil case
Which of these can hold the least amount of water?	Bathtub	Coffee cup	Spoon	Fish tank
Which of these would hold the most soil?	Bucket	Wheelbarrow	Shovel	Handful
Which of these would hold the most hot chocolate?	Large pot	Mug	Small pot	Spoon
Which of these would hold the most amount of candy?	Toy chest	Snack bag	Cereal box	Trash can
Which of these can hold the least amount of juice?	Water bottle	Teaspoon	Pitcher	
Which of these containers can hold the most?	Bathtub	Small cup	Coffee cup	Juice box
Which of these would hold the most toys?	Toy chest	Pencil case	Snack bag	
Which of these can hold the most water?	Bucket	Spoon	Plate	Bottle
Which of these containers can hold the least?	Swimming pool	Aquarium	Bathtub	Watering can
Which of these can hold the most soup?	Large pot	Small bowl	Teacup	Spoon
Which of these containers would hold the most cookies?	Large jar	Plate	Small Paper bag	Lunch box

Capacity

Capacity is the amount a container can hold. We can use smaller containers to fill a larger container. It is important to not underfill or overfill when we are measuring the capacity of a container.

Example - 4 smaller paper cups fill the larger cup

Directions: Show how many of the smaller things will fit into the larger container

Which Object Has More Mass?

Mass is the amount of matter in an object. Objects with more mass have more weight. But, weight depends on where the object is and mass is always the same.

Example - We weigh very little on the moon because gravity isn't as strong, but our mass is the same.

Instruction: Circle which object you think has more mass

1) 	2)  vs 
3)  vs 	 vs 
5)  vs 	6)  vs 
7)  vs 	8)  vs 
9)  vs 	10)  vs 

Comparing Mass – Ordering Vehicles

Questions

Order the vehicles from heaviest (1) to lightest (3)

1)

2)

3)

4)

Activity Title: Shape Art Gallery

Objective

What are we learning about?

To help students recognize, describe, and understand various 2-D shapes through a creative arts and crafts project.

Materials

What you will need for the activity.

- Construction paper in various colors
- Safety scissors
- Rulers
- Geometry templates (triangles, quadrilaterals, pentagons, hexagons, octagons)
- Glue sticks
- Markers or crayons
- Poster board for mounting the art

Instructions

How you will complete the activity.

1. Begin with a discussion on different 2-D shapes. Show students various shapes and discuss their names and properties, such as the number of sides and corners.
2. Hand out sheets of different colored construction paper and geometry templates to each student.
3. Allow students to choose the shape templates they want to work with. They can trace the shapes on their chosen colored papers.
4. Have students carefully cut out the shapes they have traced.
5. Instruct students to think about a picture or scene they can create using the shapes they've cut out. It could be a house, a tree, or anything they like.
6. Provide them with glue sticks and markers to assemble their shape art on a new piece of construction paper.
7. Once the artworks are complete, have each student present their art to the class, describing the shapes used.
8. Display the completed artworks in the classroom as a "Shape Art Gallery".

Activity Title: Shape Treasure Hunt

Objective

What are we learning about?

To help students identify and differentiate between 2D and 3D shapes through an interactive treasure hunt game.

Materials

What you will need for the activity.

- A variety of 2D and 3D shapes (circles, squares, triangles, cubes, cylinders, pyramids)
- Two large signs for a "2D Station" and "3D Station"
- Small prizes or stickers for participants

Instructions

How you will implement the activity.

- 1) Prepare by hiding the shape images around the classroom in a designated safe outdoor area before the activity starts. Prioritize shapes that are more treasure and a longer hunt.
- 2) Divide students into small groups to encourage teamwork.
- 3) Explain the difference between 2D (flat shapes) and 3D (shapes with depth) before starting the hunt.
- 4) On your signal, allow the students to start searching for the hidden shape images.
- 5) Once a student finds an image, they must decide if it is a 2D or 3D shape and then go to the corresponding station to stand. Optional: have students keep searching for the "treasure" shapes if you want to keep them engaged.
- 6) When all shapes are found, gather the students at each station and review each found image as a group, confirming whether it was correctly identified as 2D or 3D.
- 7) Discuss why each shape belongs to its category, reinforcing the characteristics of 2D and 3D shapes.
- 8) Provide small prizes or stickers to all participants for their effort and learning.

Activity Title: Geometric Builders

Objective

What are we learning about?

To help students understand the structure and properties of different 3D geometric shapes by creating them using toothpicks and marshmallows.

Materials

What you will need for the activity.

- Toothpicks
- Marshmallows (various sizes)
- Worksheet with diagrams of 3D shapes
- Coloured markers
- Paper for sketching.

Instructions

How you will complete the activity.

- 1) Explain the basic elements of 3D shapes: edges, vertices, and faces.
- 2) Show the students examples of 3D shapes like cubes, pyramids, and cones, and refer to the worksheet.
- 3) Distribute toothpicks and marshmallows to the students.
- 4) Guide the students to connect the toothpicks with marshmallows to form vertices and edges of the shapes illustrated on their worksheets.
- 5) Encourage them to use the colored markers to color the marshmallows according to the number of edges each vertex joins (e.g., blue for 3 edges, red for 4 edges).
- 6) Allow students to experiment with creating their own 3D shapes once they have completed the examples.
- 7) Assist the students in comparing their shapes with the diagrams to check for accuracy.

Worksheet

Use the following diagrams to construct your 3D shapes

Reflection

Answer the questions below.

1) Which 3D object was the hardest to make? Explain.

2) Draw _____ below.

3) Draw a rectangular prism below.

4) Draw a triangular prism below.

Activity Title: Build 3D Using 2D Shapes

Objective

What are we learning about?

Students will use 2D shapes to create a 3D tree with layered shapes to give the picture depth – a third dimension.

Materials

What you will need for the activity.

- Coloured paper (green, brown, and other festive colours)
- Glue sticks
- Safety scissors
- Template of 2D shapes
- Glitter or stickers for decoration
- Large sheet of white paper for background

Instructions

How you will complete the activity.

- 1) Start with an introduction to the shapes they will be using as triangles and rectangles.
- 2) Hand out the safety scissors and coloured paper. Cut out a green triangle for the tree and a brown rectangle for the trunk.
- 3) Show the students how to cut large triangles for the tree and a rectangle for the trunk.
- 4) Guide them to glue the triangle on the larger background paper as the tree.
Optional: fold the shapes to give the picture more depth.
- 5) Have them glue the rectangle at the bottom of the triangle to represent the tree trunk.
- 6) Offer glitter and stickers for them to decorate their tree to make it festive.
- 7) Allow each student to use additional colored paper to cut out presents, stars, or other decorations to add to their scene.
- 8) Once everyone is done, encourage them to present their artwork to the class and describe what they made.
- 9) Hang the completed projects in the classroom or a common area to showcase their work.

Activity Title: Shape Explorers

Objective

What are we learning about?

This arts and crafts activity engages students in understanding the relationship between 2-D shapes and 3-D objects by identifying and matching shapes to objects.

Materials

What you will need for the activity.

- Cut-out 2-D shapes (circle, square, rectangle, triangle)
- Various 3-D objects (e.g., cans, balls, blocks)
- Safety scissors
- Recording sheets or paper
- Pencils

Instructions

How you will complete the activity

1. Begin by reviewing basic 2-D shapes (circle, square, rectangle, triangle) with the class. Show the students different 3-D objects (e.g., a ball, a can, a block) and discuss their shapes.
2. Distribute the cut-out 2-D shapes to each student. Place the 3-D objects around the classroom in different stations.
3. Instruct students to visit each station and match the 2-D shapes to the faces of the 3-D objects (e.g., matching a circle to the top of a can).
4. Have students record which 2-D shapes they matched to each 3-D object on their recording sheets.
5. Once all students have visited each station, gather the class to discuss their findings. Ask students to share which 2-D shapes they found on each 3-D object and how they matched them.

Activity Title: Sound Clap Patterns

Objective

What are we learning about?

Students will create and recognize patterns using clapping and other sounds. This activity helps students understand and identify patterns through a fun and interactive method.

Materials: What will you need for the activity?

- None

Instructions

How you will complete the activity

1. Begin by explaining to the students that they will create patterns using clapping and other sounds, like snap or stomp.
2. Demonstrate a simple pattern, such as "clap, snap, clap," and have the students repeat it.
3. Divide the students into small groups and ask each group to come up with their own unique sound pattern.
4. Allow each group to perform their pattern in front of the class.
5. After each performance, ask the rest of the class to identify and extend the pattern. For example, if the pattern is "clap, clap, snap, clap," the next part could be "clap, clap, snap, clap, clap, clap, snap, clap."
6. Repeat the process with each group, encouraging creativity and variation in the patterns they create.

Reflection

Answer the questions below.

1) Write the sound sequence that shows the order of your sound pattern. (e.g.: snap, clap, clap, stomp,...etc.)

2) Draw the sound sequence of your pattern. For example, draw a picture of hands clapping, fingers snapping, or feet stomping for each part of your pattern.

3) Write the sound sequence of your favourite pattern you heard today.

Repeating A/B Patterns

Instructions

Label the A/B patterns below and extend the pattern with 3 more objects

A A B A B

Repeating Patterns – Fingers

Instructions

Continue the repeating patterns below with three more hands

Activity Title: Pattern Pizzas

Objective

What are we learning about?

Students will create and recognize patterns using "toppings" to make paper pizzas. This engaging activity combines art, math, and even a bit of culinary fun, as they learn about patterns in a context they're familiar with and enjoy.

Materials What you will need for the activity.

- Paper plates (or circles cut from construction paper for the pizza base)
- Coloured paper or foam cut into various shapes (to represent different toppings like pepperoni, mushrooms, olives)
- Glue sticks
- Markers for decorating

Instructions

How you will complete the activity

1. Start by discussing what patterns are and how they appear in everyday objects, like pizzas. Show examples of simple patterns using toppings.
2. Give each student a paper plate and a set of paper toppings. Ask them to design a pizza using toppings in a repeating pattern. For instance, they could create a pattern like olive, pepperoni, mushroom, olive, pepperoni, mushroom.
3. Students glue their toppings onto their paper plates according to their planned patterns. Encourage them to be as creative as they like, maybe even naming their special pizza.
4. Once everyone is done, students present their pattern pizzas to the class. They explain their pattern choice and discuss what makes it a pattern.
5. As each student presents, the rest of the class can guess the pattern and suggest how it might be extended or changed.

Activity Title: Pattern Pass Along

Objective

What are we learning about?

To engage students in understanding and creating growing patterns using blocks, enhancing their pattern recognition skills and encouraging cooperative learning. Students will start a pattern and then adapt and extend patterns started by their peers.

Materials: What will need for the activity.

- A variety of stacking cubes
- Timers or stopwatches
- Paper and pencils for each student to record their original pattern and observations

Instructions

How you will complete the activity

1. Each student receives an equal number of blocks in different colours.
2. Allow three minutes for every student to start their own growing pattern on their desk or designated workspace.
3. After three minutes, instruct every student to move to the desk next to theirs.
4. Give students two minutes to analyze the pattern in front of them and then add on to it, continuing the growing sequence. They should only add 1 more figure.
5. Repeat step 4 until each student has returned to their original starting position or until students begin running out of blocks.
6. Once back at their starting position, each student should observe how their initial pattern has evolved.
7. Have students write down any changes they notice and what additions were made by others. Does the pattern still work?

Name: _____

What is a Cycle?

A cycle is when events happen over and over. For example, we all have a sleep and awake cycle. The two events repeat over and over. We sleep and then we wake up and then we sleep again and then we wake up. Cycles are repeating patterns.

Night and day are two more events that happen over and

over. It is daytime and then nighttime, and then daytime again.

This cycle has repeated for a long time!

Cycles In Your Life

Can you think of 6 important things you do everyday? Put them in the cycle below.

--	--	--	--	--	--

Cycle _____ a cycle of events in your life

Exploring Cycles in Math and Real Life

Objective

What are we learning about?

To help students understand the concept of cycles in math and recognize cycles they observe in everyday life through engaging and hands-on activities.

Materials

What you will need for the activity.

- Paper plates or cardstock
- Markers or crayons
- Scissors
- Tape or glue
- Picture cards showing different parts of a cycle (e.g., day and night, seasons, life cycle of a plant, etc.)
- A large clock or clock face for demonstration

Instructions

How you will complete the activity

1. Begin by explaining the concept of cycles to the students using simple language. Show them examples of cycles in nature, such as the day and night cycle or the four seasons.
2. Distribute paper plates, markers or crayons, scissors, and tape or glue to each student. Explain that they will be creating their own cycle using the picture cards provided.
3. Ask the students to draw and cut out pictures representing different parts of a cycle on their paper plates. For example, they could draw the sun and moon to represent day and night or the four seasons.
4. Have the students arrange their pictures in a circle on the plate, using tape or glue to secure them. Explain that this represents a cycle.
5. Once all students have finished their plates, gather them together and discuss the different cycles they have created. Ask them to explain their drawings and how they show a cycle.

Ideas

Choose from one of the cycle ideas below or choose your own

Cycle Type

The water cycle (evaporation, condensation, precipitation)

Day and night cycle

The four seasons (spring, summer, fall, winter)

Life cycle of a butterfly (egg, larva, pupa, adult)

Life cycle of a frog (egg, tadpole, froglet, adult)

Daily routine (wake up, breakfast, school, lunch, afternoon, night)

Weekdays (Monday to Friday)

Plant growth cycle (seed, sprout, plant, fruit)

Recycling process (collect, sort, process, reuse)

Food chain cycle (sun, plant, herbivore, carnivore)

The moon phases (new moon, first quarter, full moon, last quarter)

School day routine (arrival, lessons, lunch, play, dismissal)

Tooth brushing routine (brush, rinse, floss, mouthwash)

Car washing process (rinse, soap, scrub, rinse, dry)

Cooking process (prepare, cook, serve, eat, clean)

Laundry cycle (wash, dry, fold, put away)

Traffic light cycle (green, yellow, red)

Life cycle of a tree (seed, sapling, young tree, mature tree)

Seasons - Cycle

Cycle

Draw pictures that come to mind for each season

PREVIEW

Summer

Fall

Winter

Lunar Cycle

Have you ever noticed that the moon looks different some nights than others? That is because we have a cycle that the moon goes through. This cycle is called the **Lunar Cycle**. We have 8 different looking moons.

Draw

Draw each of the moons in the boxes below

New Moon	Waning Crescent Moon	Last Quarter Moon	Waning Gibbous Moon
Waxing Crescent Moon	First Quarter Moon	Waxing Gibbous Moon	Full Moon

Experiment – Moon Phases

Recreate the moon phases using Oreo cookies. Follow the instructions below to complete the activity.

Materials

What you need

- 8 Oreos
- Paper plate
- A popsicle stick to use for scraping the icing

Procedure

How you do the activity

- 1) Separate the cookie so that the icing is on one side of the cookie and not the other. Twisting the cookie a bit works to achieve this.
- 2) Use the popsicle stick to create each phase of the moon
- 3) Glue the phase of the moon onto the paper plate. Make sure to put them in order
- 4) Label the moon phases with their official name

Introduction – Days of the Week

**Instructions**

Answer the questions below using the word bank

Sunday	Monday	Tuesday	Wednesday
Thursday	Friday	Saturday	

1) What day is after Sunday?	
2) What day is before Friday?	
3) What day is after Saturday?	
4) What day is before Friday?	
5) What day is before Thursday?	
6) What day is two days after Monday?	
7) What day is before Monday?	
8) What is the first day of school in a week?	
9) What day does the weekend start on?	
10) What day is the middle of the school week?	

Exit Cards

Cut Out

Cut out the exit cards below and have students complete them at the end of class

Name: _____

Answer the questions below.

1) If today is Tuesday, what day is tomorrow?

Answer: _____

2) If today is Monday, what day will it be in four days?

Answer: _____

3) What day comes three days after Thursday?

Answer: _____

Name: _____

Answer the questions below.

1) If today is Wednesday, what day is tomorrow?

Answer: _____

2) If today is Monday, what day will it be in four days?

Answer: _____

3) What day comes three days after Thursday?

Answer: _____

Name: _____

Answer the questions below.

1) If today is Wednesday, what day is tomorrow?

Answer: _____

2) If today is Monday, what day will it be in four days?

Answer: _____

3) What day comes three days after Thursday?

Answer: _____

Months of the Year - Questions

Questions

Answer the questions below

1) What month is your birthday?

2) How many months are there in a year?

3) What 2 months do you have holidays in the summer?

5) Which month do you start school?

7) Which month is your favourite?

Months
of the
Year

4) Which months end in -er?

6) Which month does school end?

Months of the Year - Calendar

Part 1

How many days are in the following months?

Month	Days in the Month
January	
February	
March	
April	
May	
June	
July	
August	
September	
October	
November	
December	

**Part 2**

Answer the questions below

1) Which months have 30 days?

2) Which month has the least number of days?

--

3) Which day is the first day of the year?

--

Seasons - Questions

Questions

Answer the questions below

1) Which season is the coldest?

2) Which season is the warmest?

4) Which season comes after summer?

5) Which season comes after winter?

7) Which season comes after spring?

9) What is your favourite season?

Seasons
of the
Year

3) What are the 4 seasons?

6) Which season comes after fall?

8) What is your least favourite season?

Exit Cards

Cut Out

Cut out the exit cards below and have students complete them at the end of class

Name: _____

True or False?

1) Wednesday comes next after Monday.	True	False
2) Fall is before summer.	True	False
3) There are 12 months in a year.	True	False
4) There are 8 days in a week.	True	False

Name: _____

True or False?

1) Wednesday comes next after Monday.	True	False
2) Fall is before summer.	True	False

3) There are 12 months in a year.	True	False
4) There are 8 days in a week.	True	False

Four Corners Activity: Days, Months, and Seasons

Objective What are we learning about?

To help students reinforce their knowledge of the days of the week, months of the year, and seasons through an engaging and interactive activity.

Materials What you will need for the activity.

- A list of questions related to the days of the week, months of the year, and seasons
- Labels for each corner (A, B, C, D)

Instructions How you will complete the activity.

1. Prepare the classroom by labelling each corner with A, B, C, and D.
2. Explain to the students that you will read out questions related to the days of the week, months, and seasons, and each question will have four options (A, B, C, D).
3. When you read a question, students will move to the corner that corresponds to the answer they think is correct. Some of these will be opinion questions. For these questions, have students discuss their opinions in that corner with others who also chose that option. Then discuss as a class.
4. Once all students have chosen their corners, reveal the correct answer and discuss why it is correct.
5. Repeat with different questions to reinforce their understanding of concepts.

Question	A	B	C	D
Which day comes after Tuesday?	Monday	Wednesday	Thursday	Friday
How many days are there in January?	28	29	30	31
Which month comes before April?	March	May	June	July
Which season is the coldest?	Spring	Summer	Fall	Winter
Which of these is a summer month?	December	August	February	November
How many months are there in a year?	10	11	12	13
Which month has 30 days?	April	June	September	October
Which season comes after winter?	Spring	Summer	Fall	Winter
Which is your favourite day of the week?	Sunday	Saturday	Other	
Which month has 28 or 29 days?	January	March	April	
How many days are there in a week?	5	6	7	8
Which day is the first day of the week?	Sunday	Tuesday	Wednesday	
Which month comes after November?	January	February	December	October
Which is your favourite season?	Spring	Summer	Fall	Winter
Which of these is an autumn month?	May	June	September	July
Which season is the warmest?	Spring	Summer	Fall	Winter
Which month comes before August?	July	September	October	June
Which day comes before Saturday?	Sunday	Monday	Friday	Thursday
Which season comes after winter?	Summer	Spring	Fall	Winter

Exit Cards

Cut Out

Cut out the exit cards below and have students complete them at the end of class

Name: _____

Balance the equation below:

1) $1 + 5 = \underline{\quad} + 2$

2) $4 + \underline{\quad} = 2 + 5$

3) $8 + 3 = 6 + \underline{\quad}$

4) $\underline{\quad} + 4 = 5 + \underline{\quad}$

Name: _____

Balance the equation below:

1) $1 + 5 = \underline{\quad} + 2$

2) $4 + \underline{\quad} = 2 + 5$

3) $8 + 3 = 6 + \underline{\quad}$

4) $\underline{\quad} + 4 = 5 + \underline{\quad}$

Name: _____

Balance the equation below:

1) $1 + 5 = \underline{\quad} + 2$

2) $4 + \underline{\quad} = 2 + 5$

3) $8 + 3 = 6 + \underline{\quad}$

4) $\underline{\quad} + 4 = 5 + \underline{\quad}$

Name: _____

Balance the equation below:

1) $1 + 5 = \underline{\quad} + 2$

2) $4 + \underline{\quad} = 2 + 5$

3) $8 + 3 = 6 + \underline{\quad}$

4) $\underline{\quad} + 4 = 5 + \underline{\quad}$

Equalities or Inequalities?

Alex and Tim are brothers. Their parents try to make sure they get equal amounts. Decide below if what they get is the equal or unequal.

DirectionsIs the scenario equal (=) or unequal ($\neq$)?

1) Alex got 5 red blocks and 3 blue blocks. Tim got 5 red blocks and 6 blue blocks.

Did they get the same number of blocks?

(=)

2) Alex got 4 apples and 3 oranges. Tim got 5 apples and 3 oranges.

Did they get the same number of fruits?

(=)

($\neq$)

3) Alex got 6 yellow balloons and 7 purple balloons. Tim got 6 yellow balloons and 7 purple balloons.

Did they get the same number of balloons?

(=)

($\neq$)

4) Alex got 3 seashells and 2 starfish. Tim got 5 seashells and 2 starfish.

Did they get the same number of things?

(=)

($\neq$)

5) Alex got 6 candy bars and 2 lollipops. Tim got 3 candy bars and 4 lollipops.

Did they get the same number of candies?

(=)

($\neq$)

6) Alex picked 5 red flowers and 5 blue flowers. Tim picked 7 red flowers and 3 blue flowers.

Did they get the same number of flowers?

(=)

($\neq$)

Making Equal Teams

Split the teams up equally in the situations below. Write the addition number sentence that goes with it.

Directions

Follow the instructions above to answer the equations

- 1) During recess, 8 friends want to play soccer. They need to have the same number of players on each team. How many players should be on each team?

Number Sentence _____ + _____ = 8

- 2) In Ms. Johnson's class, there are 10 students. She wants to make two teams for a relay race. How many students should be on each team so that the teams are equal?

Number Sentence _____

- 3) A group of 14 children are playing a game of tag. How many children should be on each team to split into two teams? How many children will be on each team?

Number Sentence _____ + _____ = _____

- 4) During a field trip, Mr. Lee has 20 students who want to go on a nature walk. He wants to split them into two equal groups. How many students should be in each group?

Number Sentence _____ + _____ = _____

Making Equal Teams

Directions

Answer the questions below

- 1) Emma and her 10 friends are playing basketball. They split into two teams, with 5 players on one team. How many players will be on the other team?

- 2) In the schoolyard, 8 students want to play a game of capture the flag. They divide into two teams. One team has 4 players. How many players will be on the other team?

- 3) During lunchtime, 14 kids want to play a game of soccer. They make two teams. One team has 7 players. How many players will be on the other team?

- 4) Lily and her friends are playing a game of duck-duck-goose. There are two teams of 10 kids each. How many kids are playing in total?

Pre-Algebra – Balancing Addition Equations

Balance the scales by putting the same amount of circles on each scale

Answer: Add 6 circles to the scale to make them equal.

Question How many balls do you need to add to balance the scales?

$$7 + \square = 11$$

$$\square + \square = \square$$

$$9 + \square = 13$$

$$6 + \square = 10$$

$$8 + \square = 14$$

$$3 + \square = 12$$

$$7 + \square = 11$$

$$6 + \square = 14$$

$$1 + \square = 11$$

Pre-Algebra – Balancing Addition Equations

Balancing equations means both sides of the equal sign must be the same.

Examples:

$$\begin{array}{c} 10 \\ \swarrow \downarrow \searrow \\ 3 + 7 = \boxed{10} \end{array}$$

$$\begin{array}{c} 30 \\ \swarrow \downarrow \searrow \\ 24 + 6 = \boxed{30} \end{array}$$

Instructions:

Fill in the missing number to balance the equation

1) 5

2) 3 + 5 =

3) 3 + 6 =

4) 1 +

=

5) 6 + = 8

6) 4 + = 10

7) + 5 = 8

8) + 6 = 9

9) 4 = 9

10) + 6 = 9

11) 4 + = 8

12) 6 + 6 =

13) + 6 = 16

14) 7 + = 9

15) 4 + 12 =

Making 20 – Fill in the Blanks**Questions**

How many more dots do you need to add to make 20?

1)

$$= 20$$

2)

$$13 + \underline{\quad} = 20$$

3)

$$15 + \underline{\quad} = 20$$

4)

$$12 + \underline{\quad} = 20$$

5)

$$14 + \underline{\quad} = 20$$

6)

$$15 + \underline{\quad} = 20$$

7)

$$16 + \underline{\quad} = 20$$

8)

$$14 + \underline{\quad} = 20$$

9)

$$10 + \underline{\quad} = 20$$

10)

$$15 + \underline{\quad} = 20$$

Exit Cards

Cut Out

Cut out the exit cards below and have students complete them at the end of class

Name: _____

How many more dots do you need to add to make 20?

$$11 + \underline{\quad} = 20$$

$$13 + \underline{\quad} = 20$$

Name: _____

How many more dots do you need to add to make 20?

$$11 + \underline{\quad} = 20$$

$$13 + \underline{\quad} = 20$$

Name: _____

How many more dots do you need to add to make 20?

$$11 + \underline{\quad} = 20$$

$$13 + \underline{\quad} = 20$$

Name: _____

How many more dots do you need to add to make 20?

$$11 + \underline{\quad} = 20$$

$$13 + \underline{\quad} = 20$$

Are They Equal? Addition to 10

InstructionsCircle true if the equation is equal and false if it is not

1)	$1 + 2 = 3$	True	False
2)	$2 + 4 = 5$	True	False
3)	$2 = 2$	True	False
4)	$4 + 5 = 9$	True	False
5)	$6 + 2 = 8$	True	False
6)	$3 + 5 = 8$	True	False
7)	$5 + 5 = 10$	True	False
8)	$6 + 3 = 10$	True	False
9)	$4 + 7 = 10$	True	False
10)	$2 + 8 = 10$	True	False

Are They Equal? Addition to 20**Instructions**Circle true if the equation is equal and false if it is not

1)	$8 + 3 = 12$	True	False
2)	$9 + 5 = 14$	True	False
3)	$9 + 8 = 17$	True	False
4)	$8 + 6 = 14$	True	False
5)	$10 + 4 = 14$	True	False
6)	$14 + 5 = 18$	True	False
7)	$17 + 2 = 19$	True	False
8)	$13 + 5 = 18$	True	False
9)	$16 + 3 = 20$	True	False
10)	$18 + 2 = 20$	True	False

Addition to 20 – Are They Equal?

Are the equations equal? Put a slash through the equal sign for any equations that are not equal

$5 + 3 = 8$

$8 + 4 \neq 13$

$14 + 6 = 20$

Instruction: Put a slash ($\neq$) through the equal sign if it is not balanced

$1) 2 + 2 = 4$

$2) 3 + 2 = 5$

$3) 3 + 3 = 5$

$4) 3 + 5 = 9$

$5) 4 + 5 = 9$

$6) 6 + 5 = 11$

$7) 6 + 2 = 7$

$8) 6 + 4 = 10$

$10) 8 + 3 = 11$

$11) 9 + 4 = 12$

$12) 8 + 5 = 13$

$13) 10 + 5 = 14$

$14) 12 + 3 = 15$

$15) 15 + 4 = 20$

Addition Expressions – Equal?

Are the expressions equal? Put a slash through the equal sign for any equations that are not equal

Examples: $5 + 3 = 2 + 6$ $4 + 5 \neq 7 + 1$

Instructions: Put a slash ($\neq$) through the equal sign if it is not balanced

1) $2 + 3 = 5$	7) $5 + 4 = 3 + 6$
2) $5 + 1 = 2$	8) $4 + 4 = 7 + 1$
3) $6 + 4 = 7 + 2$	9) $6 + 2 = 9 + 1$
4) $8 + 5 = 5 + 8$	10) $4 + 7 = 8$
5) $12 + 4 = 11 + 5$	11) $14 + 5 = 13 + 4$
6) $16 + 3 = 19 + 0$	12) $18 + 2 = 15 + 5$

Exit Cards

Cut Out

Cut out the exit cards below and have students complete them at the end of class

Name: _____

Put a slash ($\neq$) through the equal sign if it is not balanced.

- 1) $3 + 9 = 4 + 8$
- 2) $15 + 2 = 18$
- 3) $11 + 4 = 5 + 2 + 8$

Name: _____

Put a slash ($\neq$) through the equal sign if it is not balanced.

- 1) $3 + 9 = 4 + 8$
- 2) $15 + 2 = 18$
- 3) $11 + 4 = 5 + 2 + 8$

Name: _____

Put a slash ($\neq$) through the equal sign if it is not balanced.

- 1) $3 + 9 = 4 + 8$
- 2) $15 + 2 = 18$
- 3) $11 + 4 = 5 + 2 + 8$

Name: _____

Put a slash ($\neq$) through the equal sign if it is not balanced.

- 1) $3 + 9 = 4 + 8$
- 2) $15 + 2 = 18$
- 3) $11 + 4 = 5 + 2 + 8$

Addition – Which Equation Matches?

Two of the expressions equal the same number. Which one matches the shaded in expression

Example

$4 + 7$

$9 + 2$

$5 + 5$

Questions Circle the expression that matches the shaded in expression

1)

$4 + 3$

$2 + 5$

$2 + 6$

2)

$5 + 4$

$4 + 3$

$2 + 7$

3)

$7 + 3$

$5 + 5$

$6 + 3$

4)

$6 + 5$

$4 + 7$

5)

$9 + 3$

$7 + 4$

$6 + 6$

6)

$8 + 6$

$10 + 4$

$7 + 8$

7)

$10 + 7$

$12 + 4$

$9 + 8$

The Answer Is... What Is The Question?

How many number sentences can you write that equals the numbers below? Use only **addition** for these answers.

**Instructions**

The answer is _____, what is the question?

Answer	10
_____ + _____ = 10	
_____ + _____ = 10	
_____ + _____ = 10	
_____ + _____ = 10	
_____ + _____ = 10	

Answer	8
_____ + _____ = 8	
_____ + _____ = 8	
_____ + _____ = 8	
_____ + _____ = 8	
_____ + _____ = 8	

Answer	15
_____ + _____ = 15	
_____ + _____ = 15	
_____ + _____ = 15	
_____ + _____ = 15	
_____ + _____ = 15	

Answer	13
_____ + _____ = 13	
_____ + _____ = 13	
_____ + _____ = 13	
_____ + _____ = 13	
_____ + _____ = 13	

Exit Cards

Cut Out

Cut out the exit cards below and have students complete them at the end of class

Name: _____

The answer is **9**, what is the question?

1) _____ = 9

2) _____ + _____ = 9

3) _____ + _____ = 9

4) _____ + _____ = 9

Name: _____

The answer is **9**, what is the question?

1) _____ + _____ = 9

2) _____ + _____ = 9

3) _____ + _____ = 9

4) _____ + _____ = 9

Name: _____

The answer is **9**, what is the question?

1) _____ + _____ = 9

2) _____ + _____ = 9

3) _____ + _____ = 9

4) _____ + _____ = 9

Name: _____

The answer is **9**, what is the question?

1) _____ + _____ = 9

2) _____ + _____ = 9

3) _____ + _____ = 9

4) _____ + _____ = 9

Addition Word Problems – Finding Unknown Number**Questions**

Answer the questions below

1) Barry had 4 blocks. His teacher gave him more blocks. Now he has 9 blocks. How many blocks was he given?

2) Tim drank 4 glasses of water in his morning. He's had 9 glasses of water in total today. How many glasses did he drink in the afternoon?

3) Ted brought 5 crackers to school. His friend gave him some more crackers. He now has 12 crackers. How many crackers did his friend give him?

Addition Word Problems – Finding Unknown Number**Questions**

Answer the questions below

1)

In a fish tank, there are 6 red fish. There are 16 fish in the fish tank altogether. How many blue fish are in the fish tank?

Number Sentence

2)

Ben found 13 seashells. His sister also found some seashells. Together, they found 17 seashells. How many seashells did his sister find?

Number Sentence

3)

Emma has 3 pencils in her pencil case. Her mom buys her more pencils. Now Emma has 15 pencils in her pencil case. How many pencils did her mom buy for her?

Number Sentence

Answer the question below

Sam collected 9 shells at the beach.
His brother collected some more
shells. Together, they have 20 shells.
How many shells did his brother
collect?

Answer: _____

Name: _____

Answer the question below

Sam collected 9 shells at the beach.
His brother collected some more
shells. Together, they have 20 shells.
How many shells did his brother
collect?

Answer: _____

Algebra Jeopardy

Objective

What are we learning about?

To reinforce students' understanding of basic algebraic concepts and their application to solve simple equations and word problems in a fun and competitive game for

Materials

What you will need for the activity.

- Jeopardy board and the questions
- Buzzer or bell

Instructions

How you will complete the activity

1. Print the Jeopardy board on the next page.
2. Divide the class into two teams.
3. Ask one team to go first by selecting a dollar value.
4. Read the question aloud from the dollar value.
5. The first team to ring the bell or buzzer gets to answer.
6. If they answer correctly, award them the points. If not, another team can answer.
7. Continue the game until all questions have been answered.
8. Tally the points to determine the winning team.
9. Conclude by discussing what they learned about the topic in the questions.

Jeopardy Questions

Ask students the questions below

\$100	\$200	\$300	\$400	\$500
$__ + 3 = 5$	$__ + 5 = 10$	$8 + __ = 8 + 2$	$11 + 3 = __ + 8$	Balance: $__ + 17 = 20 + __$
Emma has 2 apples. She gets 3 more. How many apples does she have now?	A dog had 5 bones. It finds some more and now has 9. How many bones did she find?	$3 + __ = 15$	$7 + 5 = __ + 10$	$12 + __ = 10 + 14$
$__ + 1 = 4$	Balance: $__ + __ = 13$	$__ + __ = 10$	If $7 + __ = 15$, what is $__$?	Sarah had 14 candies. She got some more to make 20. How many did she get?
$__ + 4 = 9$	$__ + 6 = 14$	$1 + __ = 5$	Balance: $__ = __$	$10 + 18 = __ + 11$
If Lisa has 3 marbles and finds 5 more, how many marbles does she have?	If you have 12 stickers and find 4 more, how many do you have?	$9 + __ = 17$	Balance: $12 + __ = 5 + 12$	A basket has 14 apples and there are 5 more apples. How many apples are there in total?
$__ + 2 = 8$	$4 + __ = 11$	Balance: $__ + 11 = 10 + 5$	Max has 5 toy cars. He gets 2 more from his brother and 3 more from his friend. How many toy cars does he have now?	Joe had 20 balloons. He got some more and now has 32. How many did he get?

Pre-Algebra – Balancing Subtraction Equations

Balance the scales by taking away circles from the scale

Answer: take 4 circles from the scale to make them equal.

$$7 - 4 = 3$$

Question How many balls do you need to take away to balance the scales?

$$10 - \square = 7$$

$$6 - \square = \square$$

$$8 - \square = 4$$

$$7 - \square = 1$$

$$11 - \square = 5$$

$$12 - \square = 3$$

$$11 - \square = 6$$

$$14 - \square = 5$$

$$6 - \square = 0$$

Pre-Algebra – Balancing Subtraction Equations

Balancing equations means both sides of the equal sign must be the same.

Examples: $\overset{3}{7} - 4 = \boxed{3}$

$\overset{8}{14} - 6 = \boxed{8}$

Questions

Fill in the missing number to balance the equations

1) 5

2) $4 - 2 = \boxed{}$

3) $5 - 4 = \boxed{}$

4) $7 - \boxed{} = 3$

5) $8 - \boxed{} = 2$

6) $10 - \boxed{} = 7$

7) $\boxed{} - 7 = 1$

8) $\boxed{} - 6 = 4$

9) $\boxed{} - 10 = \boxed{}$

10) $\boxed{} - 4 = 7$

11) $9 - \boxed{} = 5$

12) $7 - 1 = \boxed{}$

Are They Equal? Subtraction to 20

QuestionsCircle true if the equation is equal and false if it is not

1)	$13 - 2 = 11$	True	False
2)	$15 - 4 = 12$	True	False
3)	$14 - 3 = 11$	True	False
4)	$19 - 6 = 13$	True	False
5)	$20 - 6 = 15$	True	False
6)	$13 - 2 = 10$	True	False
7)	$16 - 5 = 11$	True	False
8)	$18 - 7 = 12$	True	False
9)	$19 - 8 = 11$	True	False
10)	$20 - 8 = 11$	True	False

Subtraction to 20 – Are They Equal?

Are the equations equal? Put a slash through the equal sign for any equations that are not equal.

$7 - 2 = 5$

$12 - 3 \neq 8$

$15 - 3 = 12$

Questions Put a slash $\neq$ through the equal sign if it is not balanced

1) $4 - 2 = 2$	2) $3 - 1 = 1$	3) $5 - 1 = 4$
4) $5 - 3 = 2$	5) $6 - 2 = 4$	6) $7 - 5 = 3$
7) $7 - 3 = 4$	8) $8 - 4 = 4$	9) $9 - 5 = 4$
10) $10 - 4 = 5$	11) $13 - 3 = 10$	12) $14 - 6 = 8$
13) $14 - 3 = 11$	14) $16 - 5 = 11$	15) $18 - 4 = 14$
16) $19 - 0 = 0$	17) $17 - 3 = 13$	18) $20 - 5 = 15$

Exit Cards

Cut Out

Cut out the exit cards below and have students complete them at the end of class

Name: _____

Put a slash $\neq$ through the equal sign if it is not balanced.

- 1) _____
- 2) $10 - 5 =$ _____
- 3) $11 - 6 = 7 - 2$
- 4) $12 - 3 = 9 - 2$

Name: _____

Put a slash $\neq$ through the equal sign if it is not balanced.

- 1) $9 - 4 = 6$
- 2) $10 - 5 = 4 - 1$
- 3) $11 - 6 = 7 - 2$
- 4) $12 - 3 = 9 - 2$

Name: _____

Put a slash $\neq$ through the equal sign if it is not balanced.

- 1) $9 - 4 = 6$
- 2) $10 - 5 = 4 - 1$
- 3) $11 - 6 = 7 - 2$
- 4) $12 - 3 = 9 - 2$

Name: _____

Put a slash $\neq$ through the equal sign if it is not balanced.

- 1) $9 - 4 = 6$
- 2) $10 - 5 = 4 - 1$
- 3) $11 - 6 = 7 - 2$
- 4) $12 - 3 = 9 - 2$

Activity Title: Card Sort Challenge

Objective

What are we learning about?

The objective of this activity is to help students practice their addition and subtraction skills by forming correct equations that match a given result. This activity encourages teamwork, critical thinking, and quick problem-solving.

Materials: What you will need for the activity.

- Index cards
- Markers
- Timer (optional)
- Whiteboard or chalkboard (display for equations)

Instructions

How you will complete the activity

1. Prepare index cards in advance by writing different numbers on some cards and operation signs (plus and minus) on others.
2. Divide the class into small groups, each group gets a set of number cards and operation cards. Optional: hand out more than 1 set to each group.
3. Set a timer for 5 minutes. Each group must try to arrange their cards into as many correct equations as possible using their cards.
4. At the end of the timer, ask each group to share their equations with the class. Verify the correctness of each equation.
5. Groups earn points for each correct equation they create. Bonus points for using as many cards as possible (having multiple addends/subtrahends).
6. The group with the most points at the end wins.

Cards

Cut out the cards below

=	=	=	=	=
+	+	+	+	+
-	-	-	-	-
5	12	3	2	
1	4	7	8	
10	15	14	8	6
3	0	1	4	7
6	2	3	10	11

Subtraction – Which Equation Matches?

Two of the expressions equal the same number. Which one matches the shaded in expression?

Example

$9 - 4$

$8 - 3$

$10 - 6$

Instruction Circle the expression that matches the shaded in expression

1)

$7 - 3$

$8 - 5$

2)

$7 - 1$

$10 - 3$

3)

$9 - 2$

$8 - 1$

$10 - 3$

4)

$12 - 3$

$11 - 1$

5)

$15 - 5$

$13 - 3$

$14 - 3$

6)

$18 - 6$

$13 - 2$

$14 - 2$

7)

$20 - 7$

$16 - 3$

$17 - 5$

Matching Game: Do The Equations Match

Objective

What are we learning about?

To enhance students' understanding of equality within addition and subtraction equations. Students will identify and match pairs of equations that yield the same result, fostering critical thinking and problem-solving skills in a collaborative group setting.

Materials

What you will need for the activity.

- Pre-prepared pre-cut matching cards.
- Small bags or envelopes to hold the sets for each group.

Instructions

How you will complete the activity.

1. Before the class, the teacher will cut out the prepared matching game cards.
2. Divide the students into small groups and give each group a small envelope containing a set of the matching cards.
3. In their groups, students will spread out the cards face down on their table.
4. Each person takes a turn to try to match two cards. They will need to solve both equations to see if they match (equal the same).
5. If they find a correct match, they keep the cards out and continue with their next turn. If the cards don't match, they turn them back over in the same place, and the next player takes a turn.
6. The activity continues until all pairs are correctly matched within each group.

The Answer Is... What Is The Question?

How many number sentences can you write that equals the numbers below? Use only **subtraction** for these answers.

Instructions

The answer is _____, what is the question?

Answer	2
_____ - _____ = 2	
_____ - _____ = 2	
_____ - _____ = 2	
_____ - _____ = 2	
_____ - _____ = 2	

Answer	8
_____ - _____ = 8	
_____ - _____ = 8	
_____ - _____ = 8	
_____ - _____ = 8	
_____ - _____ = 8	

Answer	5
_____ - _____ = 5	
_____ - _____ = 5	
_____ - _____ = 5	
_____ - _____ = 5	
_____ - _____ = 5	

Answer	11
_____ - _____ = 11	
_____ - _____ = 11	
_____ - _____ = 11	
_____ - _____ = 11	
_____ - _____ = 11

Subtraction Word Problems – Finding Unknown Number**Questions**

Answer the questions below

1)

Jack has 12 marbles. He gives some marbles to his friend. Now he has 7 marbles left. How many marbles did he give to his friend?

Number Sentence

$12 - \underline{\quad} = 7$

2)

Sarah has 15 cookies. She eats some of them. After eating, she has 10 cookies left. How many cookies did she eat?

Number Sentence

$15 - \underline{\quad} = 10$

3)

There are 18 ducks in the pond. Some ducks swim away. Now there are 12 ducks left in the pond. How many ducks swam away?

Number Sentence

$18 - \underline{\quad} = 12$

Task Cards: Mystery Number Detectives

Objective

What are we learning about?

To help students understand and solve one-step algebraic equations by finding the value of a missing number.

Materials

What you will need for the activity.

- 20 task cards
- Student answer sheet for answers
- Pencils

**Instructions**

How to conduct the activity

1. Introduce the concepts covered in the task cards.
2. Organize the students into pairs and provide each pair with their sets of task cards.
3. Give each pair an answer recording sheet to record their answers.
4. Encourage teamwork by having students collaborate on finding solutions.
5. Allow students to select any task card to begin with, emphasizing that they can complete the cards in any order they prefer.
6. Instruct students to record the letter of their chosen answer (A, B, or C) on their answer sheet beside the task card's number.
7. Consider using a timer to create a dynamic challenge, adjusting the duration to fit the lesson's objectives and complexity.
8. After the activity, review the answers collectively, discussing any challenging questions and strategies used to solve them.
9. Have students reflect on the activity, sharing the methods they applied and obstacles they overcame.

Task Cards

Cut out the task cards below

Card 1:

$$10 - \text{star} = 3$$

solve for star.

Are They Equal? True or False (Up To 10)

InstructionsCircle true if the equation is equal and false if it is not

1)	$2 + 2 = 5 - 1$	True	False
2)	$1 + 2 = 4 - 2$	True	False
3)	$7 - 3 = 4 + 0$	True	False
4)	$8 - 5 = 3 + 0$	True	False
5)	$7 - 3 = 1 + 3$	True	False
6)	$4 + 3 = 8 - 2$	True	False
7)	$4 + 1 = 8 - 4$	True	False
8)	$5 - 0 = 3 + 2$	True	False
9)	$8 - 1 = 5 + 2$	True	False
10)	$7 + 2 = 10 - 1$	True	False

Unit Test - Equalities**Part 1**

Circle true if the equation is equal and false if it is not

1)	$2 + 4 = 5$	True	False
2)	$7 + 5 = 12$	True	False
3)	$7 - 4 = 4$	True	False
4)	$6 = 7$	True	False
5)	$8 = 5$	True	False
6)	$5 - 1$	True	False
7)	$13 - 2 = 9 + 2$	True	False
8)	$14 + 2 = 10 - 1$	True	False

Part 2

Circle the expression that matches the sum in

1)	$4 - 2$	$6 - 4$	8
2)	$14 - 3$	$12 - 2$	$15 - 4$
3)	$8 + 6$	$7 + 7$	$3 + 9$
4)	$12 + 4$	$11 + 5$	$13 + 4$

Part 3

Balance the equations below by filling in the blanks

1)

2)

Part 4

How many more dots do you need to make 10 or 20?

1)

$$3 + \underline{\quad} = 10$$

$$14 + \underline{\quad} = 20$$

Part 5

Solve the word problem below. Make sure to write the equation

Simon had 14 dollars in his piggy bank. He was given some money from his father for his birthday. He now has 20 dollars. How much did his father give him?

Part 6

The answer is ____, what is the question?

Answer

11

$$\underline{\quad} + \underline{\quad} = 11$$

$$\underline{\quad} + \underline{\quad} = 11$$

$$\underline{\quad} + \underline{\quad} = 11$$

$$\underline{\quad} + \underline{\quad} = 11$$

$$\underline{\quad} + \underline{\quad} = 11$$

Answer

8

$$\underline{\quad} - \underline{\quad} = 8$$

$$\underline{\quad} - \underline{\quad} = 8$$

$$\underline{\quad} - \underline{\quad} = 8$$

$$\underline{\quad} - \underline{\quad} = 8$$

$$\underline{\quad} - \underline{\quad} = 8$$

3-Part Lesson Format

Part 1 – Minds On!

- Learning Goals
- Discussion Questions
- Quotes
- And More!

Learning Goal

We are learning to read and show numbers up to 50 so we can understand how numbers are used in daily life.

Discussion Questions

- 1) What numbers do you see around you every day? Can you find some in the classroom right now?
- 2) Can you think of a time when knowing numbers helped you in real life? Maybe at a store, playing a game, or telling time?
- 3) How would the world be different if we didn't have numbers? What would be tricky to do?

The Number Zero - 0

How many candies are in the jar? Drag the numbers to answer.

How many fish are in the bowl? Drag the numbers to answer.

Partitioning Objects

Questions

Circle the objects to put them in groups. Then count the objects

Title: Object Counting Race

Objective

What are we learning about?

To enhance students' ability to recognize, at a glance, and name familiar arrangements of 1 to 10 objects, dots, and pictures.

Materials

What you will need for the activity.

- Small objects like marbles, beans, or small blocks
- Small containers or cups
- Number cards for counting
- Worksheets for recording results

Instructions

How to conduct the activity

1. Divide the students into groups. Give each group a set of 10 small objects and 1 container or cup.
2. Explain that you will call out a number between 1 and 10, and students must quickly place the correct number of objects into one of the containers.
3. Start the game by calling out a number between 1 and 10.
4. Students will place the correct number of objects into the container as quickly as possible.
5. Once a group finishes placing the objects, they should call out "done" and you will check their arrangement.
6. The first group to correctly place the objects wins the round.
7. Repeat the process with different numbers, calling out a new number each time.
8. Continue the game for several rounds to ensure everyone has ample practice.
9. Encourage students to work quickly but accurately, emphasizing the importance of both speed and correctness.
10. After the game, discuss with the class how recognizing familiar arrangements of objects helped them place the correct number quickly.

Activity Title: Number Comparison Relay

Objective

What are we learning about?

Students will practice comparing numbers up to 20 by participating in a relay race where they identify numbers as greater than, less than, or equal to a given number.

Materials

What you will need for the activity.

- Number cards (1-20) for each group
- Large paper or board for writing comparison symbols ($>$, $<$, $=$)
- Tape or chalk for marking start and finish lines

Instructions

How you will play the game.

1. Divide the students into small groups and give each group a set of number cards from 1 to 20.
2. Use tape or chalk to mark a start line and a finish line.
3. Write comparison symbols ($>$, $<$, $=$) on large paper or board and place them at the finish line.
4. Explain to the students that they will be participating in a relay race. Each group will work together to compare numbers.
5. At the start line, have each group line up behind their set of number cards.
6. On your signal, the first student in each group picks a number card and runs to the finish line.
7. The student at the finish line must place their number card under the correct comparison symbol ($>$, $<$, $=$) based on a number you call out (e.g., "Compare to 10").
8. Once they have placed their card, they run back and tag the next student in their group, who repeats the process with a new number card.
9. The relay continues until all number cards have been used and all students have had a turn.
10. After the relay, review the placements of the number cards as a class and discuss any errors.

Four Corners Activity: Estimation

Objective

What are we learning about?

To help students practice and improve their estimation skills by visually assessing quantities and making informed guesses.

Materials

What you will need for the activity.

- A list of questions to ask
- Labels for each corner of the room (A, B, C, D)

Instructions

What you will do to complete the activity

1. Prepare the classroom by labelling each corner with letters A, B, C, and D.
2. Explain to the students that you will display a question on the smart board or projector with a container filled with a certain number of objects.
3. Read out a question about the quantity of objects in the container and provide four multiple-choice options (A, B, C, and D).
4. When you read the question, students will move to the corner of the room that corresponds to the answer they think is correct.
5. Once all students have chosen their corners, reveal the correct answer and discuss why it is correct.
6. For some questions, ask students to discuss their estimation strategies and reasoning with others who chose the same option. Then discuss as a class.
7. Repeat with different graphics and questions to reinforce their estimation skills and understanding.
8. Encourage students to explain their thought process and share tips on making better estimates.
9. This activity helps students practice their estimation skills, encourages critical thinking, and fosters group discussion and reasoning.

Two More, Two Less

Activity: Number Neighbours

Objective

What are we learning about?

To enhance students' ability to identify the number, up to 20, that is one more, two more, one less, and two less than a given number.

Materials

What you will need for the activity.

- Number cards 1 to 20
- Small objects like beans, beads, or small blocks
- Paper and crayons for markers

Instructions

Here is how you will do the activity

1. Give each student a number card and a set of small objects.
2. Ask the students to place the number of objects that matches their number card in front of them.
3. Explain that they will find out what number is one more, one less, two more, and two less than the number on their card.
4. Ask the students to add one object to their group and write down the new number. Then, ask them to add one more object and write down the new number again.
5. Next, ask the students to remove one object from their original group and write down the new number. Then, ask them to remove one more object and write down the final number.
6. Once they have written all the numbers, ask the students to draw a picture that represents the numbers they found.
7. Bring the class together and have each student share their original number and the numbers they found that are one more, two more, one less, and two less. They can also share their drawings.

Addition or Subtraction?

**Think**

Is the question an addition or subtraction question?

	Question	Addition	Subtraction
1)	Mary has 6 stickers. Her friend gives her 4 more stickers. How many stickers does Mary have now?	Addition	Subtraction
2)	John has 10 toy cars. He buys 5 more toy cars. How many toy cars does John have now?	Addition	Subtraction
3)	There are 15 pencils in a box. 8 pencils are taken out. How many pencils are left in the box?	Addition	Subtraction
4)	Sarah has 12 dolls. Her friend gives her 3 more dolls. How many dolls does Sarah have now?	Addition	Subtraction
5)	There were 11 cookies on the plate. Mom and Dad each ate 2 cookies. How many cookies are left on the plate?	Addition	Subtraction
6)	There are 8 apples on the table. Mom puts 6 more apples on the table. How many apples are on the table now?	Addition	Subtraction
7)	Sam has 9 marbles. He finds 3 more marbles on the playground. How many marbles does Sam have in total?	Addition	Subtraction
8)	Jane has 14 dollars. She gives 6 dollars to her friend. How many dollars does Jane have left?	Addition	Subtraction
9)	There are 7 ducks in the pond. 4 more ducks fly in to join them. How many ducks are there now?	Addition	Subtraction
10)	There are 20 birds on the tree. 8 birds fly away. How many birds are left on the tree?	Addition	Subtraction

Addition and Subtraction Word Problems**Think**

Answer the questions below

	Question	
1)	There were 12 books on the shelf. Tommy took 4 books to read and then brought back 2. How many books are now on the shelf?	
2)	There were 15 kids playing in the playground. 10 kids went home and then 3 more came to play. How many kids are playing in the playground now?	
3)	There were 10 balloons at the party. 4 balloons popped and then 6 more balloons were blown up. How many balloons are at the party now?	

Addition and Subtraction Story**Think**

Answer the questions below

Once upon a time, there was a little girl named Lily who loved playing with her toys. She had a toy box full of all her favorite toys. One day, she decided to count all her toys. She counted 14 toys in total! She had 6 dolls, 4 toy cars, 3 stuffed animals, and a toy airplane.

Lily wanted to play with her dolls, but she realized that she had too many in her toy box. She wanted to give away 5 toys to her friends. After she gave away the toys, Lily counted how many toys she had left.

How many toys did she have left?

Lily chose to give away 1 toy car, 2 dolls, and 2 stuffed animals. How many of each toys did she have left?

Dolls (D): _____

Cars (C): _____

Stuffed Animals (S): _____

Toy Airplanes (T): _____

Lily felt happy that she was able to share her toys with her friends. She played with her dolls, stuffed animal, toy cars, and toy airplane for the rest of the day, knowing that she had the perfect number of toys left.

Addition and Subtraction Word Problems

Think

Circle the addition/subtraction sentence that represents the situation

1) There were 9 birds on a tree. 5 more birds came to sit on the tree. How many birds are on the tree now?

- A) $9 + 5 =$
B) $9 - 5 =$
C) $5 + 4 =$
D) $9 + 6 = 15$

2) Timmy had 15 crayons. He lost 9 crayons. How many crayons does Timmy have now?

- A) $15 + 9 = 24$
B) $9 + 15 = 24$
C) $15 - 9 = 6$
D) $9 - 15 = 6$

3) There are 10 apples in a basket. 7 more apples are added. How many apples are in the basket now?

- A) $10 - 7 = 3$
B) $7 + 10 = 17$
C) $10 + 7 = 17$
D) $7 - 10 = 3$

4) Jenny has 6 marbles. Her friend gave her 8 more marbles. How many marbles does she have in total?

- A) $6 - 8 = 2$
B) $8 + 6 =$
C) $6 + 8 =$
D) $8 - 6 = 2$

5) There were 20 pencils in the box. 11 pencils were used. How many pencils are left in the box?

- A) $20 - 11 = 9$
B) $11 - 20 = 9$
C) $20 + 11 = 31$
D) $11 + 20 = 31$

6) Sarah has 18 stickers. She gave 5 stickers to her friend. How many stickers does Sarah have now?

- A) $5 + 18 = 23$
B) $5 - 18 = 13$
C) $18 + 5 = 23$
D) $18 - 5 = 13$

Writing Addition Sentences**Think**

Write the addition sentences below and solve the problem

1)

There are 8 fish in a pond. 3 more fish swim in. How many fish are in the pond now?

Addition Sentence

2)

Sarah has 7 cookies. John has 5 more cookies. How many cookies does Sarah have in total?

Addition Sentence

3)

There are 6 cupcakes on a plate. 2 more cupcakes are added to the plate. How many cupcakes are on the plate now?

Addition Sentence

Math Quest: Addition and Subtraction Word Problems**Objective**

What are we learning about?

To help students understand and practice addition and subtraction word problems, and to write corresponding addition and subtraction sentences.

Materials What you will need for the activity.

- Index cards or paper
- Recording sheet provided

**Instructions**

How you will complete the activity

1. Prepare a set of index cards with different addition and subtraction word problems.
2. Divide the students into small groups and distribute the index cards to each group.
3. Each group should read the word problem on their card, and write the corresponding addition or subtraction sentence on the recording sheet provided.
4. Students can solve the problems in any order.
5. Give students a pre-set time limit to write as many number sentences as they can.
6. Once the time is up, go over each question with the class.
7. Discuss the solutions as a class, focusing on different strategies used to solve the problems.

Index cards

Cut out the task cards below

Card 1:

Tom found 7 shells and then found 5 more. How many shells does he have now?

Card 5:

Lucas has 9 pencils and then buys 3 more. How many pencils does he have now?

Card 6:

Sarah had 12 marbles and gave 4 to her friend. How many marbles does she have left?

Mia had 14 apples. She gave 8 to her neighbor. How many apples does she have left?

Card 3:

Emily bought 8 stickers and received 4 more as a gift. How many stickers does she have now?

Card 7:

Olivia had 20 coins and lost 10 more. How many coins does she have now?

Card 4:

Jack had 15 candies. He ate 6 of them. How many candies does he have left?

Card 8:

Liam had 18 cookies. He gave 9 to his friends. How many cookies does he have left?

Index cards

Cut out the task cards below

Card 9:

Noah read 7 pages yesterday and 6 pages today. How many pages did he read in total?

Card 13:

Oliver had 14 balloons. He gave 6 to his friend. How many balloons does he have now?

Card 14:

Emma had 20 Lollipops. She gave 9 to her friend. How many Lollipops does she have left?

Emma had 13 cookies. She ate 5. How many cookies does she have now?

Card 11:

Jake has 5 toy cars and gets 7 more. How many toy cars does he have now?

Ava has 3 books. She gets 4 more. How many books does she have now?

Card 12:

Mia has 8 flowers and picks 6 more. How many flowers does she have now?

Card 16:

Noah had 12 marbles. He lost 4. How many marbles does he have now?

Index cards

Cut out the task cards below

Card 17:

Sophie has 5 stickers and buys 8 more. How many stickers does she have now?

Card 21:

Mason had 13 toy cars. He gave 4 to his brother and lost 2. How many toy cars does Mason have now?

Card 22:

Ella had 15 crayons. She gave 2 to her friend. How many crayons does she have now?

Isabella had 10 cupcakes. She ate 2 and gave 3 to her friends. How many cupcakes does Isabella have left?

Card 19:

Tim has 6 apples and buys 8 more. How many apples does he have now?

Card 23:

Sam had 12 toy cars. He gave 5 to his brother. How many toy cars does he have now?

Card 20:

Grace has 7 toys and gets 5 more. How many toys does she have now?

Card 24:

Ben had 18 balls. He lost 10. How many balls does he have now?

Cut out the exit cards below and have students complete them at the end of class

Name: _____

a) Answer the questions below

Alex had 20 toy soldiers. He gave 8 to his brother and then got 6 more. How many toy soldiers does Alex have now?

b) Write the subtraction sentence and solve the problem

There were 8 pencils in the box. 3 pencils were taken out. How many pencils are left in the box?

_____ - _____ = _____

Name: _____

a) Answer the questions below

Alex had 20 toy soldiers. He gave 8 to his brother and then got 6 more. How many toy soldiers does Alex have now?

b) Write the subtraction sentence and solve the problem

There were 8 pencils in the box. 3 pencils were taken out. How many pencils are left in the box?

_____ - _____ = _____

Name: _____

a) Answer the questions below

Alex had 20 toy soldiers. He gave 8 to his brother and then got 6 more. How many toy soldiers does Alex have now?

b) Write the subtraction sentence and solve the problem

There were 8 pencils in the box. 3 pencils were taken out. How many pencils are left in the box?

_____ - _____ = _____

Name: _____

a) Answer the questions below

Alex had 20 toy soldiers. He gave 8 to his brother and then got 6 more. How many toy soldiers does Alex have now?

b) Write the subtraction sentence and solve the problem

There were 8 pencils in the box. 3 pencils were taken out. How many pencils are left in the box?

_____ - _____ = _____

Mental Math – Counting On (Up To 18)

1. Circle the higher number on the hundreds chart/number line.
2. Count up by the other number and write down the answer.

Part 1

Use the chart to answer the question

1) $4 + 5 =$ _____ 	2) $8 + 6 =$ _____ 	3) $8 + 3 =$ _____ 
4) _____ + 4 = _____ 	5) $3 + 6 =$ _____ 	6) $2 + 5 =$ _____ 
7) $8 + 8 =$ _____ 	8) _____ + 7 = _____ 	9) $9 + 4 =$ _____ 
10) $9 + 9 =$ _____ 	11) $5 + 6 =$ _____ 	12) _____ + 8 = _____ 

Part 2

Use the number line to find the answer

1) $3 + 9 =$ _____ 
2) $6 + 4 =$ _____ 
3) $5 + 9 =$ _____ 

Mental Math Strategy – Making Tens**Directions:**

1. Create a ten by taking some from the other number.
2. Add the remaining amount.

1) 7

$$10 + 2 = 12$$

2) $9 + 6$ 

$$= \underline{\hspace{2cm}}$$

3) $8 + 9$ 

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

4) $8 + 8$ 

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

5) $5 + 7$ 

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

6) $9 + 8$ 

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

7) $8 + 12$ 

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

8) $9 + 8$ 

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

9) $8 + 7$ 

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Base Ten Blocks Addition**Instructions**

Add the base ten blocks below

1)

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

4)

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

2)

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

5)

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

3)

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

6)

$$\underline{\quad} + \underline{\quad} = \underline{\quad}$$

Exit Cards

Cut Out

Cut out the exit cards below and have students complete them at the end of class

Name: _____

a) Add the money below

b) Create a ten and add the remaining amount.

_____ + _____ = _____

Name: _____

a) Add the money below

b) Create a ten and add the remaining amount.

_____ + _____ = _____

Name: _____

a) Add the money below

b) Create a ten and add the remaining amount.

_____ + _____ = _____

Name: _____

a) Add the money below

b) Create a ten and add the remaining amount.

_____ + _____ = _____

Ten Frame Addition**Instructions**

Complete the addition sentences below

1)

$$3 + \underline{\quad} = \underline{\quad}$$

2)

$$6 + \underline{\quad} = \underline{\quad}$$

3)

$$\underline{\quad} + 4 = \underline{\quad}$$

4)

$$4 + \underline{\quad} = \underline{\quad}$$

6)

$$\underline{\quad} + 4 = \underline{\quad}$$

7)

$$\underline{\quad} + \underline{\quad} = 11$$

8)

$$4 + \underline{\quad} = \underline{\quad}$$

9)

$$\underline{\quad} + 10 = \underline{\quad}$$

Activity : Adding Adventures: Treasure Hunt**Objective**

What are we learning about?

To help students understand and practice addition through engaging word problems involving whole numbers up to 20.

Materials

What you will need for the activity.

- Sets of index cards with addition word problems
- Markers
- Small bags or containers to hold the card sets
- Optional: small prizes (or treasure)
- Tape

$$5 + 3 = 8$$

**Instructions**

How you will implement the activity

- 1) Prepare sets of index cards with different addition word problems (up to 18).
- 2) Hide these cards around the classroom or in a designated play area, taping them under chairs, desks, or tucked into non-breakable containers.
- 3) Divide the class into small teams and give each team a small bag to collect their cards.
- 4) Explain the game: each team will hunt for a card, solve the problem as quickly as they can, and return to you for verification.
- 5) Say "Go!" Each team rushes to find their first card.
- 6) When a team thinks they have the correct answer, they come back to you. If correct, they receive a small prize (or a checkmark) and move on to find the next card.
- 7) The game continues until all cards are found or you call time. The team with the most correct answers wins.
- 8) Discuss the game, focusing on the addition problems and solutions each team encountered.

Index cards

Cut out the cards below

Max has 10 toy cars and gets 7 more. How many toy cars does he have now?

Lily has 9 marbles and finds 8 more. How many marbles does she have now?

Emma has 4 books and buys 6 more. How many books does she have now?

Noah finds 7 crayons and then gets 8 more. How many crayons does he have in total?

Ava has 12 dolls and receives 6 more as a gift. How many dolls does she have now?

Leo has 8 stickers and gets 9 more from his friend. How many stickers does he have now?

If you have 10 apples and buy 9 more, how many apples do you have in total?

There were 11 birds on a tree, and 7 more joined. How many birds are there now?

Index cards

Cut out the cards below

Mia has 9 bracelets and makes 8 more. Then her friend gives her 2 more. How many bracelets does she have now?

Lucas finds 10 blocks and then finds 6 more. His teacher gives him 4 more. How many blocks does he have in total?

Ella has 5 buttons and gets 4 more from her friend. How many buttons does she have now?

Jack has 8 pencils and buys 9 more. How many pencils does he have now?

Sophie has 5 candies at home. She gets 3 more from a friend and 6 more from her parents. How many does she have now?

Owen has 9 balloons and gets 7 more for his birthday. How many balloons does he have now?

Chloe has 3 chocolate chip cookies, 5 raisin cookies, and 8 sugar cookies. How many cookies does Chloe have?

Henry has 12 toy cars and gets 6 more as a gift. How many toy cars does he have now?

Part 2

Use the number lines to find the answers

1) $13 - 9 =$ _____

2) $16 - 4 =$ _____

3) $15 - 9 =$ _____

Subtraction Mental Math - Counting Up

Directions:

1. Start with the smaller number.
2. Count up from the smaller number to the bigger number to find the difference.
3. The difference is the answer.

Instruction: Draw a number line and answer the question

$$\text{Answer} = 2 + 4 = 6$$

$$8 - 5$$

$$13 - 9$$

$$15 - 5$$

$$18 - 12$$

Subtracting Money**Instructions**

Subtract from the money below

$$\$3 - \$10 = \underline{\hspace{2cm}}$$

$$\$14 - \$2 = \underline{\hspace{2cm}}$$

$$\$16 - \$5 = \underline{\hspace{2cm}}$$

$$\$17 = \underline{\hspace{2cm}}$$

$$\$15 - \$13 = \underline{\hspace{2cm}}$$

$$\$15 - \$14 = \underline{\hspace{2cm}}$$

$$\$18 - \$7 = \underline{\hspace{2cm}}$$

$$\$19 - \$17 = \underline{\hspace{2cm}}$$

Math Facts - Subtract by 6 & 7**Questions**

Fill in the outer layer of the bullseye

Subtraction Word Problems (Less Than 20)**Questions**

Answer the word problems below. Try drawing pictures to help you solve.

- 1) Jessica has 12 candies. She eats 7 of them. How many candies does she have left?

- 2) Jared brought 20 donuts to school. He gives 15 donuts to his class. How many donuts does he have left?

- 3) Thomas has 19 marbles. He loses 7 of them. How many marbles does he have left?

- 4) There are 16 birds on Ashley's property. 8 of them fly away. How many birds are left?

Activity: Addition/Subtraction Race

Objective

What are we learning about?

Students will practice adding numbers up to 20 by racing to solve addition problems quickly and accurately.

Materials

What you will need for the activity.

- Index cards
- Markers or pencils
- Timer (optional)

**Instructions**

How to complete the activity

1. Prepare a stack of index cards with math problems. Include a mix of simple problems to ensure variety.
2. Have students line up in a single file.
3. Call the first two students in line to the front. Explain that they will race to answer the addition question that the teacher pulls from the stack.
4. Pull a card from the stack and read the question aloud.
5. The first student to answer correctly wins the round.
6. The student who answers correctly stays at the front to compete against the next student in line.
7. The student who loses goes to the end of the line.
8. Optional: If a student wins five rounds in a row, they move to the back of the line to give others a chance to play.
9. Continue the game until all students have had a chance to compete multiple times or until the designated game time is up.

Subtraction Jeopardy

Objective

What are we learning about?

To reinforce students' understanding of basic subtraction concepts and their application to solve simple equations and word problems in a fun and competitive game for

Materials

What you will need for the activity.

- Jeopardy board and questions
- Buzzer or bell

**Instructions**

How you will complete the activity

1. Print the Jeopardy board on the next page.
2. Divide the class into two teams.
3. Ask one team to go first by selecting a dollar value.
4. Read the question aloud from the dollar value.
5. The first team to ring the bell or buzzer gets to answer.
6. If they answer correctly, award them the points. If not, another team can answer.
7. Continue the game until all questions have been answered.
8. Tally the points to determine the winning team.
9. Conclude by discussing what they learned about the topic in the questions.

Jeopardy Questions

Ask students the questions below

\$100	\$200	\$300	\$400	\$500
$6 - 2 = \underline{\quad}$	$9 - 2 = \underline{\quad}$	$13 - 2 = \underline{\quad}$	$15 - 2 - 1 = \underline{\quad}$	$19 - 13 - 4 = \underline{\quad}$
$8 - 4 = \underline{\quad}$	$12 - 4 = \underline{\quad}$	$16 - 4 = \underline{\quad}$	$18 - 5 - 3 = \underline{\quad}$	$20 - 5 - 10 = \underline{\quad}$
$10 - 6 = \underline{\quad}$	$14 - 6 = \underline{\quad}$	$19 - 17 = \underline{\quad}$	$19 - 7 - 2 = \underline{\quad}$	$18 - 7 - 9 = \underline{\quad}$
$12 - 8 = \underline{\quad}$	$15 - 8 = \underline{\quad}$	$17 - 2 - 6 = \underline{\quad}$	$18 - 9 - 5 = \underline{\quad}$	$20 - 9 - 9 = \underline{\quad}$
Alex bought 10 apples and gave 3 to his friend. How many apples does he have left?	Sam had 15 candies. He gave 5 to his friend. How many candies does she have now?	Olivia had 17 pencils. She gave 3 to her friend. How many pencils does Olivia have left?	Isabella had 14 marbles. She played a game and won 8 more marbles, but then accidentally dropped 4 marbles. How many marbles does Isabella have in total?	Emma had 18 seashells. She gave 5 seashells to her little sister and then found 3 more seashells at the beach. How many seashells does Emma have in total?
Emma had 14 pencils and gave 5 to her friend. How many pencils does she have now?	Jack had 18 marbles and lost 7. How many marbles does he have left?	Henry had 19 stickers. He stuck 6 stickers on his notebook and then lost 2 stickers during recess. How many stickers does Henry have now?	Nathan had 16 baseball cards. He traded 7 cards with his friend and then lost 2 cards on the way home. How many baseball cards does Nathan have now?	Ben had 13 chocolate bars. He ate 6 chocolate bars during a movie night and then shared 4 chocolate bars with his cousins. How many chocolate bars are left?

Fact Families - Adding/ Subtracting (10)**Questions**

Create 2 addition and 2 subtraction equations using the numbers provided

1)

3

7

$\square + \square = \square$

$\square - \square = \square$

$\square - \square = \square$

2)

5

9

4

$\square + \square = \square$

$\square + \square = \square$

$\square - \square = \square$

$\square - \square = \square$

6

2

8

$\square + \square = \square$

$\square + \square = \square$

$\square - \square = \square$

$\square - \square = \square$

4)

7

$\square + \square = \square$

$\square + \square = \square$

$\square - \square = \square$

$\square - \square = \square$

Fact Families - Adding/ Subtracting**Questions**

Create 2 addition and 2 subtraction equations using the numbers provided

1) 2, 6, 4

Equation 1 (+): $2 + 4 = 6$ Equation 2 (+): $4 + 2 = 6$ Equation 3 (-): $6 - 2 = 4$ Equation 4 (-): $6 - 4 = 2$

2) 3, 5, 8

Equation 1 (+): _____

Equation 2 (+): _____

Equation 3 (-): _____

Equation 4 (-): _____

3) 6, 10, 16

Equation 1 (+): _____

Equation 2 (+): _____

Equation 3 (-): _____

Equation 4 (-): _____

13, 7, 6

Equation 1 (+): _____

Equation 2 (+): _____

Equation 3 (-): _____

Equation 4 (-): _____

5) 15, 20, 5

Equation 1 (+): _____

Equation 2 (+): _____

Equation 3 (-): _____

Equation 4 (-): _____

6) 11, 20, 9

Equation 1 (+): _____

Equation 2 (+): _____

Equation 3 (-): _____

Equation 4 (-): _____

Matching Game: Inverse Operations Match

Objective

What are we learning about?

To enhance students' understanding of inverse operations by matching addition and subtraction equations. Students will identify and match pairs of equations that demonstrate inverse relationships, fostering critical thinking and problem-solving skills in a collaborative group setting.

Materials

What will need for the activity.

- Pre-prepared subtraction and addition cards.
- Small bags or envelopes to hold the matching sets for each group

Instructions

How you will complete the activity.

1. Before the class, the teacher will cut out the pre-prepared matching game cards, ensuring there are 10 subtraction equations and their corresponding 10 inverse addition equations.
2. Divide the students into small groups and give each group a bag/envelope containing a set of the matching cards.
3. In their groups, students will spread out the cards face down on their table.
4. Each person takes a turn to try to match two cards.
5. If they find a correct match, they keep the cards out and continue with their next turn. If the cards don't match, they turn them back over in the same place, and the next player takes a turn.
6. The activity continues until all pairs are correctly matched within each group.

Cards

Matching Game Cards

$$10 - 2 = 8$$

$$8 + 2 = 10$$

$$15 - 5 = 10$$

$$10 + 5 = 15$$

$$12 - 3 = 9$$

$$9 + 3 = 12$$

$$14 - 4 = 10$$

$$10 + 4 = 14$$

$$18 - 7 = 11$$

$$11 + 7 = 18$$

PREVIEW

Cards

Matching Game Cards

$$9 - 1 = 8$$

$$8 + 1 = 9$$

$$16 - 6 = 10$$

$$10 + 6 = 16$$

$$13 - 3 = 10$$

$$10 + 3 = 13$$

$$11 - 2 = 9$$

$$9 + 2 = 11$$

$$19 - 9 = 10$$

$$10 + 9 = 19$$

Cards

Matching Game Cards

$$8 - 2 = 6$$

$$6 + 2 = 8$$

$$9 + 5 = 14$$

$$13 - 4 = 9$$

$$9 + 4 = 13$$

$$11 - 3 = 8$$

$$8 + 3 = 11$$

$$17 - 6 = 11$$

$$11 + 6 = 17$$

PREVIEW

$$16 - 7 = 9$$

$$9 + 7 = 16$$

$$18 - 8 = 10$$

$$10 + 8 = 18$$

Operations Quiz**Part 1**

Add using the number lines below

1) $4 + 5 =$ _____

2) $7 +$ _____

**Part 2**

Add using the ten blocks below

1)

+

_____ + _____ = _____

3)

+

_____ + _____ = _____

4)

+

_____ + _____ = _____

Part 3

Subtract using the number lines below

1) $15 - 6 = \underline{\hspace{2cm}}$

2) $17 - 8 = \underline{\hspace{2cm}}$

Part 4

Draw the money and base ten blocks below

$\$14 - \$11 = \underline{\hspace{2cm}}$

$\$13 = \underline{\hspace{2cm}}$

$16 - 11 = \underline{\hspace{2cm}}$

$19 - 12 = \underline{\hspace{2cm}}$

Part 5

Addition and subtraction word problems

- 1) Hank brought 17 donuts to school for his class. He gave 14 donuts away. How many donuts does he have left?
- 2) Pam has \$12 in her bank account. She is given \$7. How much does she have now?

Part 6 Is the question an addition or subtraction question?

	Question	Addition	Subtraction
1)	Mary has 6 stickers. Her friend gives her 4 more stickers. How many stickers does Mary have now?	Addition	Subtraction
2)	Johnny has 12 toy cars. He buys 5 more toy cars at the store. How many toy cars does Johnny have in total?	Addition	Subtraction
3)	There are 20 pencils in the box. 8 pencils are taken out. How many pencils are left in the box?	Addition	Subtraction

Part 7 Write an addition or subtraction sentence below and solve the problem

1)	There are 9 fish in a pond. 4 more fish are added to the pond. How many fish are in the pond now?	
	Addition/Subtraction Sentence	

2)	Mary had 13 candy bars. She ate 4 candy bars. How many candy bars does Mary have now?	
	Addition/Subtraction Sentence
